PROFESSIONAL SUMMARY

I'm a Computer Engineering student and a Full Stack Developer who thrives at the intersection of technology and creativity. With a strong foundation in engineering and a flair for design, I specialize in crafting experiences that are visually engaging, functional, and memorable. My skill set spans UI/UX design, graphic design, photography, and game development, allowing me to approach projects from multiple perspectives. Whether it's designing intuitive interfaces, creating immersive game worlds, or capturing compelling visuals, I aim to combine aesthetics with purpose. In game development, I focus on building interactive experiences that blend storytelling, mechanics, and user engagement.

EDUCATION

St. Francis Institute of Technology
Bachelor of Computer Engineering

Aug 2023 – Present
Mumbai, Maharashtra

EXPERIENCE

CSI SFIT

Creative Head

Jul 2025 – Jun 2026

Mumbai, Maharashtra

- Designed creative layouts for Paradigm Magazine Edition 7 and 8, showcasing innovative design concepts for technical topics including Quantum Computing, AR/VR and 3D modeling.
- Lead the Creative Team to ensure cohesive visual storytelling and consistent branding across all projects.

NSS SFIT

Student Head

Jul 2025 – Jun 2026

Mumbai, Maharashtra

- Participated in community service initiatives and logistical planning for organizational events. (Update this placeholder with a specific achievement)
- Collaborated with team members to successfully execute student-led community projects. (Update this placeholder with a specific metric)

PROJECTS

Project Cura | *React, AWS Cognito, AWS DynamoDB*

- Developed a comprehensive Healthcare Management System interface focusing on seamless user experience.
- Integrated AWS Cognito to ensure robust and secure user authentication and identity management.
- Architected and managed scalable backend data structures utilizing AWS DynamoDB for real-time cloud data operations.

Customer Purchase Behavior Calculator | *Python, Machine Learning (AIML)*

- Engineered a behavior tracking tool to analyze, model, and predict customer purchasing patterns.
- Applied data analysis techniques to derive actionable insights from customer datasets.
- Established and maintained the project repository on GitHub, strictly adhering to version control best practices.

SecureWatch (AI Login Intrusion Detection) | *pgmpy, Scikit-learn, Pandas, Flask* 2026

- Architected an end-to-end security framework utilizing Machine Learning and dynamic Bayesian Networks (pgmpy) to compute real-time risk scores.
- Integrated interactive real-time dashboards utilizing Flask-SocketIO and live map APIs for immediate multi-vector attack visualization.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML/CSS, SQL, MongoDB

Web Technologies: React.js, Django, Tailwind CSS, Flask, Next.js

Game Development: Unreal, Godot, Unity, Blender, Mixamo, Daz3D

Tools & Platforms: VS Code, Git, GitHub, Figma, AWS Cognito, AWS DynamoDB

Design: Game UI Design, UI/UX Design, Graphic Design, Photography
